

MATTHEW OPIE

Boston, MA | (850) 496-6373 | matt@mattopie.com | linkedin.com/in/matthew-opie

SUMMARY

Senior Software Engineer specializing in scalable .NET/C# backends, API development, and modern cloud integrations. Proven track record of owning end-to-end system architecture, driving CI/CD automation, and delivering high-availability microservices. Deeply focused on system security, performance optimization, and engineering robust, compliance-heavy enterprise applications.

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, Python, SQL
- **Frameworks & Libraries:** .NET 8 / .NET 10, Angular, Vue.js, jQuery, MATLAB
- **Cloud & DevOps:** Azure DevOps, Azure KeyVault, CI/CD, Git, OAuth2 / Okta, AWS (Lambda, S3)
- **Tools & Platforms:** Datadog, Splunk, SolarWinds, Linux, AI-Assisted Development (Cursor, Claude, ChatGPT)
- **Specialties:** Enterprise API Architecture, Microservices, Multi-Tenancy, Secure Logging, Performance Optimization

SELECTED TECHNICAL PROJECTS

Greenfield Enterprise Insurance API Ecosystem

Confidential Client (via Infinity)

Sole Developer & Architect

- Served as the sole developer and architect for a high-performance, greenfield multi-tenant enterprise API system in **.NET 10**, orchestrating complex insurance quoting, risk rating, document uploads, and high-volume data ingestion.
- Engineered dynamic, tenant-based client routing to securely manage complex API interactions with over two dozen internal lines-of-business services and external industry platforms, including **Vertafore** and **Verisk**.
- Designed a highly secure and observable infrastructure utilizing **Azure KeyVault** for centralized secrets management, comprehensive structured logging, and enterprise-level health monitoring.
- Established rigorous software quality standards from the ground up, achieving **90%+ automated test coverage** alongside fully automated, zero-touch CI/CD deployment pipelines.

EXPERIENCE

Infinity Software Development, FL (Remote) - Consulting

December 2022 - Present

Software Engineer / Analyst

- Serve as the lead consulting developer for a large-scale insurance enterprise application built using .NET/C# and Vue.js, owning end-to-end feature delivery and technical direction.
- Accelerated feature delivery and streamlined architectural refactoring by integrating modern AI-assisted engineering tools (Cursor, Claude Code, ChatGPT) into daily development workflows.
- Onboarded and mentored two developers, serving as the technical lead to accelerate their domain knowledge and successfully integrate them into the project's delivery pipeline.
- Served as the sole developer on the project for the initial phases, consistently delivering high-quality results that strengthened client trust and directly led to expanded project scope and additional engagements for the company.
- Led the successful userbase migration to Okta OAuth2, achieving full authentication cutover with zero downtime.
- Implemented numerous UX, performance, and workflow improvements to streamline underwriter and administrator operations, handling all enhancements as a solo developer.

Greenshades Software, Jacksonville, FL (Remote)

November 2021 - December 2022

Software Developer II

- Developed and delivered key features for Payroll SaaS applications using Angular, C#, and SQL within a domain-driven microservice architecture.

- Migrated legacy .NET ASPX settings pages to Angular, preserving full automation and test coverage while improving maintainability.
- Led multiple performance-improvement initiatives, using Datadog, SolarWinds, and Splunk to diagnose issues and reduce page load times by up to 90%.
- Contributed across front-end and back-end for the company's primary profit center, producing SOLID, maintainable, self-documenting features in an Agile CI/CD environment with 95%+ test coverage.
- Wrote, tested, and launched a complete retirement catch-up contribution feature used by thousands of employees across the client base.

Johnson & Johnson Vision, Jacksonville, FL

May 2018 - November 2021

Engineer 2, R&D

- Acted as the computer vision SME, developing Cognex In-Sight inspection systems and custom .NET/C# tools to support automated quality control.
- Built and unified multiple MVVM-based .NET applications and authored automated test suites for clinical inspection and manufacturing systems.
- Developed a MATLAB machine-learning model for defect detection, improving the accuracy of sealed-lens inspection processes.
- Led cross-functional engineering efforts on multiple \$80K-\$600K R&D initiatives, defining system requirements, validating automated equipment, and coordinating with manufacturing teams.
- Delivered electromechanical and software improvements that increased production throughput from 60k to 120k+ units per day.
- Wrote low-level PLC and driver-level control code to interface manufacturing systems with injection-molding machines, enabling synchronized real-time industrial automation.

Andromeda Systems Inc., Orange Park, FL

May 2017 - May 2018

Electrical Engineering Intern

- Built a multithreaded automated data-collection system using Python, Linux, MySQL, and Apache.
- Developed a REST API and web-based admin console (HTML/CSS/JavaScript) to support system monitoring and configuration.

PATENTS & AWARDS

- **U.S. Patent - US20230065811A1:** Quality control system for sealed lens packages using computer vision and MATLAB-based machine learning.
- **J&J Inspire Award (May 2020, July 2020):** Recognized for key contributions to high-priority projects in the Medical Device division.
- **Best Senior Capstone Project (Interdisciplinary Engineering, 2019):** Awarded for designing and programming a fully operational automated saw system at the University of North Florida.

EDUCATION

- **University of North Florida, Jacksonville, FL:** Bachelor of Science in Electrical Engineering (BSEE) | May 2019.
President of UNF IEEE 2019, Vice President of UNF IEEE 2018, Captain and lead programmer of UNF IEEE Robotics Team 2018, 2019.
- **Northwest Florida State College, Niceville, FL:** Associate of Arts (AA) | May 2004.
Collegiate high school program - matriculated with AA degree.
